Fraction ARQs per Packet by BSU 2015-09-01

- **2015-09-01**
- **Rolling Average**

The graph shows the fraction of ARQs per packet over different BSUs (Base Station Units) in decimal format. The x-axis represents the BSU numbers in decimal, and the y-axis represents the fraction of ARQs per packet on a logarithmic scale.

The data points are scattered across a range of BSU numbers, with some fluctuations in the fraction values. The rolling average line smooths out the data, highlighting trends and patterns more clearly than individual data points.
